

HOW TO FORMAT DRIVES IN NTFS ON A MAC

in 3 easy steps

1.

INSTALL TUXERA NTFS for MAC

Visit www.tuxera.com to download and install the latest version of Tuxera NTFS for Mac. Then, launch Tuxera Disk Manager from the Applications folder.

2.

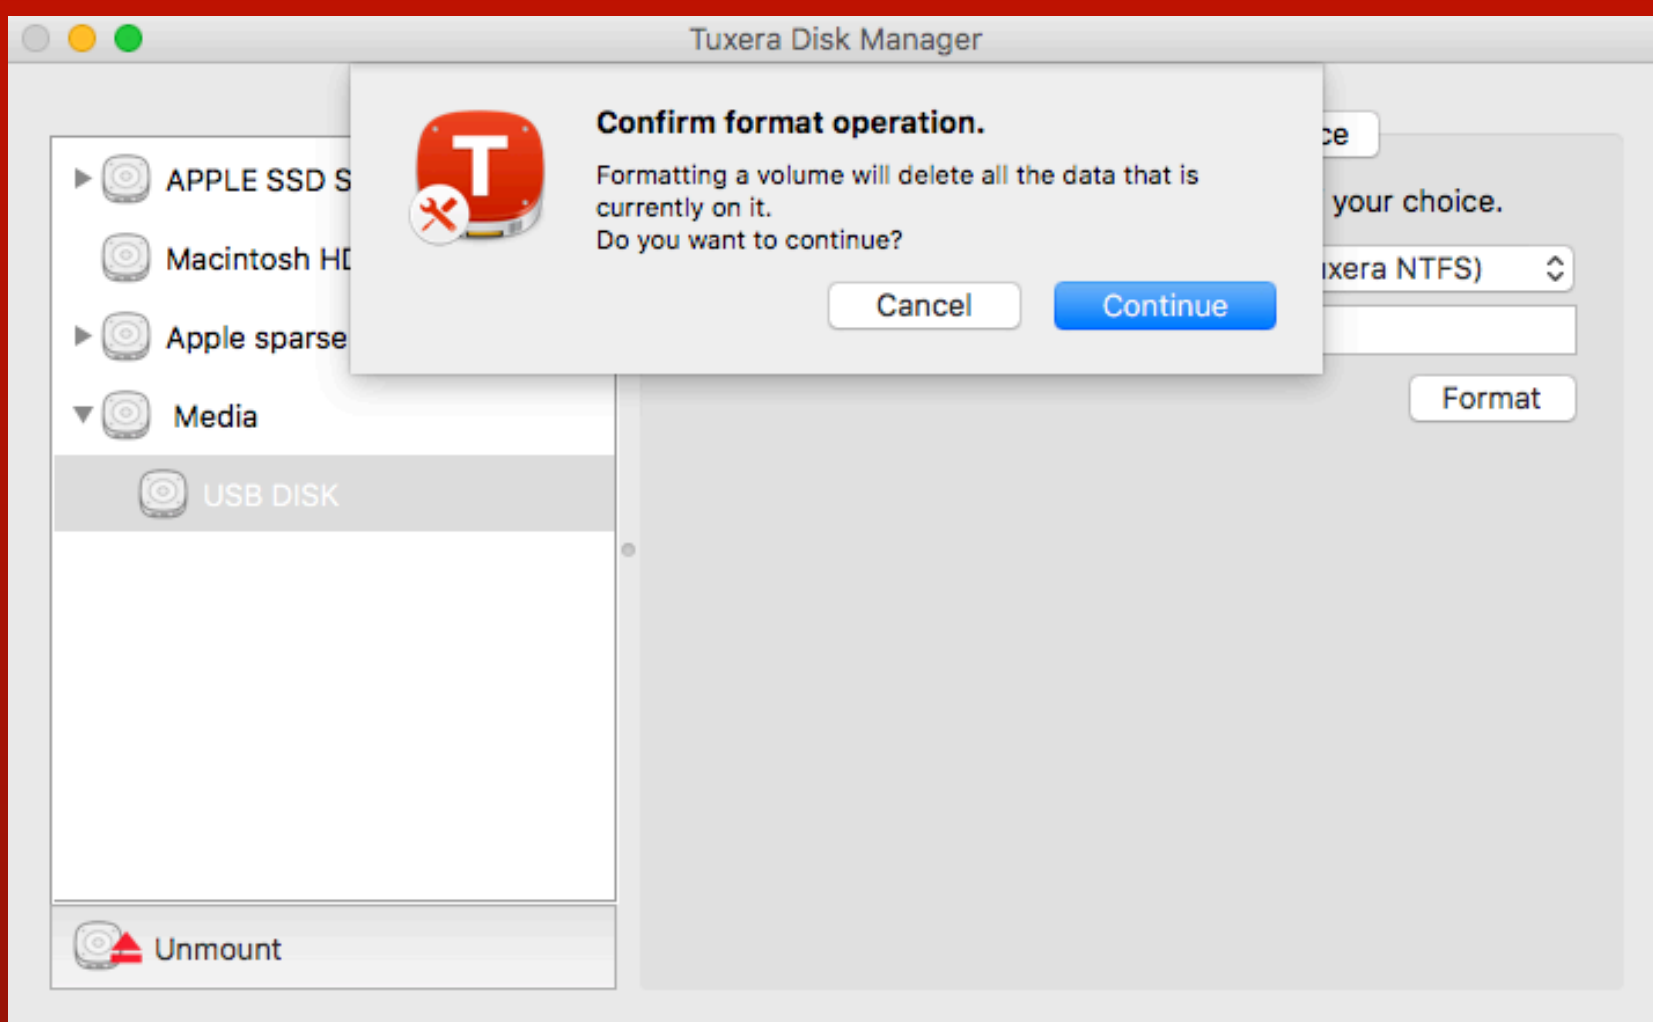

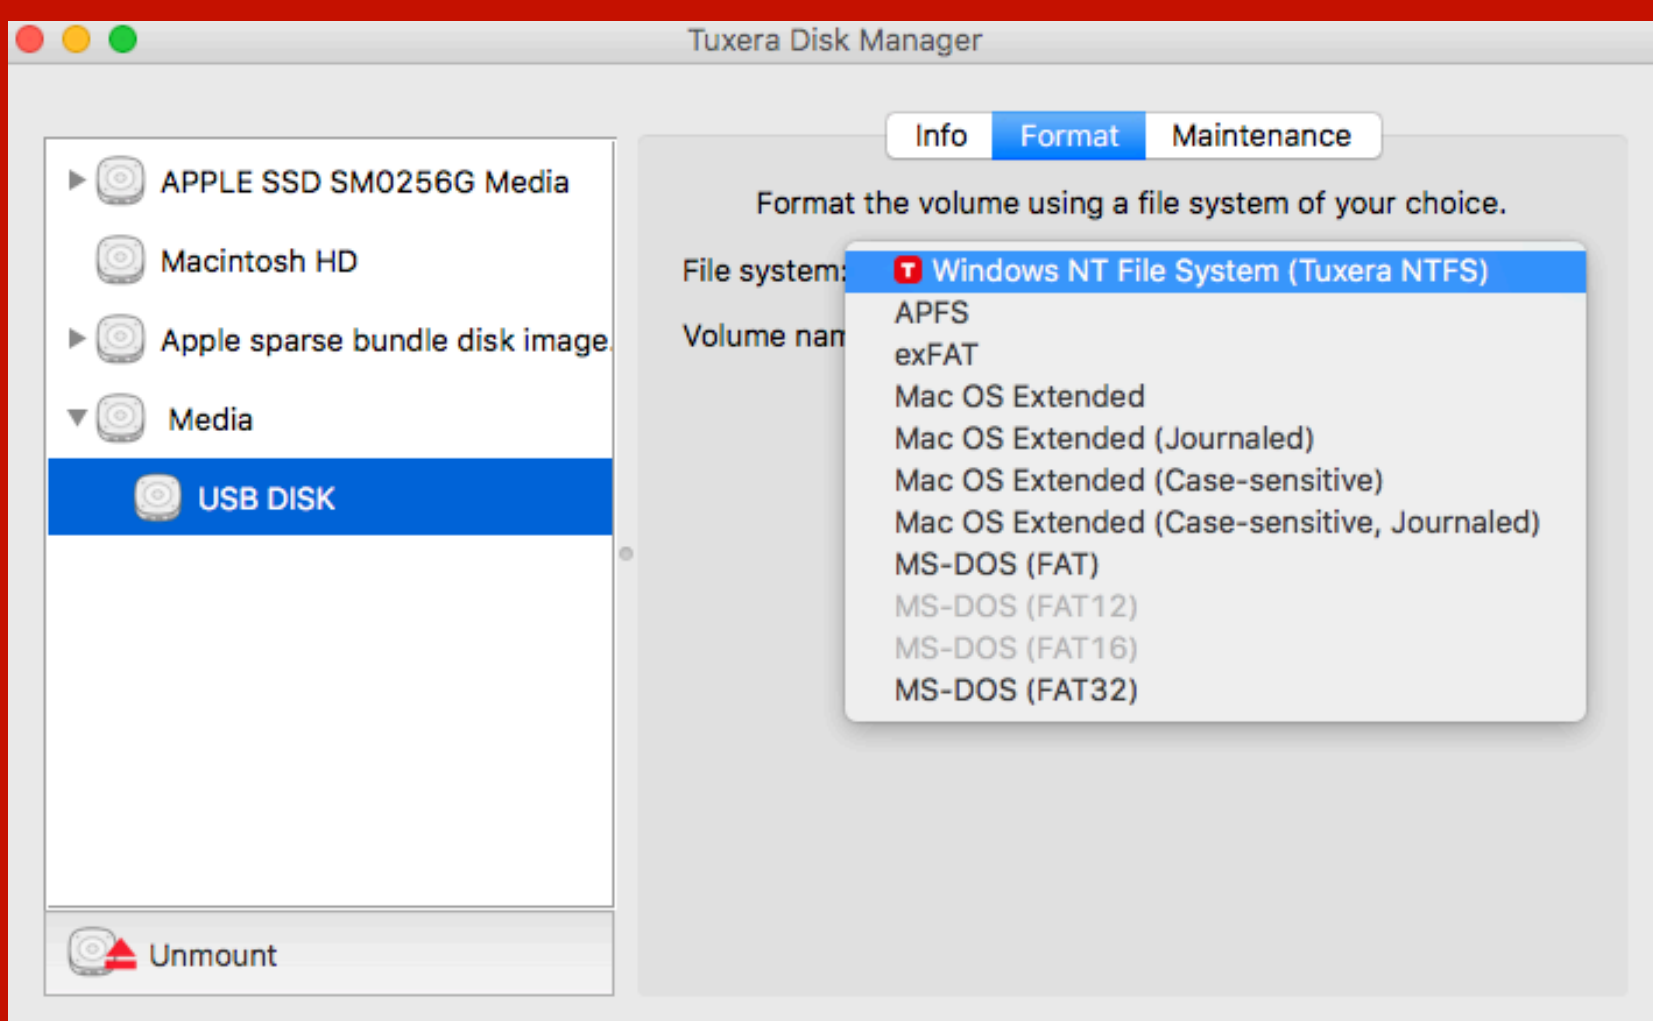

SELECT THE DRIVE'S FORMAT

On the left-side panel, select the disk you want to format. In the Format tab on the right-side panel, select Windows NTFS File System (Tuxera NTFS) and give a name to your disk.

3.

FORMAT YOUR DRIVE

Click the "Format" button. Formatting your disk will erase all of its data, so if you're sure you want to continue, click "Confirm" and you're all set!

DID YOU KNOW?

You can install Tuxera NTFS for Mac on all your home computers with a single license. Upgrades of Tuxera NTFS for Mac are also free of charge for our existing customers.
